2009-00508-F	Petrosh, Michael	-	4/6/2009	4/30/2009	Please find attached a letter from TSgt, 917th Wing FOIA Manager dated 17 Feb 09. In this letter TSgt states that, "....no records were located at the 917th Wing." The response from the 917th Wing ignores the fact that electronic copies of the UMD's in question can be retrieved from the Air Reserve Personnel Center database. The comment that the records had a disposition of "destroy 6 months after supersession" is an attempt to deny the information requested. The paper copies may have been destroyed but the information should have been maintained in the database for historical purposes. Please forward at your earliest convenience copies of the 917th Wing Command Post Unit Manning Documents mentioned in TSgt letter dated 17 Feb 09.

2009-00132-F	Petty, Robert	-	4/8/2009	4/13/2009	I am researching the X-20 Dyna Soar program, whose Project Office was listed at Wright Patterson AFB. I am looking specifically for the X-20 Simulator Pilots Operating Checklists or Instructions. The simulator was constructed by Boeing or LTV sometime between 1958-1962. Pilots conducted a variety of simulations, including pilot boost control, sub-orbital, orbital, reentry, and landing operations in the X-20 simulator. A six-degree of freedom simulator was also developed for this program. If you have checklists developed for this X-20 simulator I would also like to obtain these.

As years of research haven't turned up any decisive data regarding these missing designations, hereby I would like to request some brief data on this historical subject. As there is absolutely no public information available about the following 4 programs besides some Internet speculations, any type of relevant documentation would be helpful, even if only 2-3 pages. However, if these turn out to be still highly classified progams, then please try to furnish documentation explaining why would these 4 helicopter projects be a complete secret? (for example, due to being financial failures, usage of ultra secret technology, intended classified role, or just technological mishaps?) These four are: H-36, H-38, H-44, and H-45. Please be advised that research indicates that these numbers had to be allocated sometimes around the following timeframes: end of 1953 - January 1954 for H-36; February 1954 - end of 1954 for H-38; Summer of

Eastwood; Battelle Memorial Inst., Second Progress Report on Contract AF 33(038)-3736 to Wright Patterson Air Force Base, October 31, 1949" The report still probably is classified and maintained by Technical Reports Center in Bldg 196, Room 1, on Monahan Way, but I am not so sure who is the repository of the report. The purpose of the Second Progress Report on Contract AF 33(038)-3736 was: "Craighead, Fawn and Eastwood (1949) carried out a limited study of the Ti-Ni phase diagram up to approximately 11.5 at.% nickel within a limited temperature range but did not define the eutectic or eutectoid temperatures." The contract AF 33(038)-3736 became effective May 18, 1949 and dealt with "The Development of Titanium-base Alloys". So, also I would like to know when First Progress Report on Contract AF 33(038)-3736 was completed and released.

2009-01529-F	THOMPSON, DAVID	-	6/16/2009	6/16/2009	I was employed by a civilian contractor, CAV International. in Kuwait.. This position, Passenger Service requires a security clearance, after working there 9 months I was told that I didnt recieve a clearance to hold that position. Previous employer Omni International which is a charter carrier also for the military never had a problem with clearance. I was allowed to work as a flight attendant transporting the military all over the world. I had access to countless military bases around the world without any problem.. Not having that clarence I was sent home by employer, was told I couldnt be employed under AMC if I couldnt obtain one.. My question is.. How do I fix this problem so I can get job back? I have tried the FBI and the OPM, no one has given an answer yet. I am hoping that I get some information that can solve this problem and get me back to work.

2009-01601-F	Greenewald, John	-	6/23/2009	7/8/2009	request a copy of the final report and/or crash report and/or summary of the following event: On January 31, 1958 in French Morocco, a B-47 with one weapon in strike configuration was making a simulated takeoff during an exercise alert. When the aircraft reached approximately 30 knots on the runway, the left rear wheel casting failed. The tail struck the runway and a fuel tank ruptured. The aircraft caught fire and burned for seven hours. Firemen fought the fire for the allotted ten minutes fire fighting time for high explosive contents of that weapon, then evacuated the area. The high explosive did not detonate, but there was some contamination in the immediate area of the crash. After the wreckage and the asphalt beneath it were removed and the runway washed down, no contamination was detected. One fire truck and one fireman's clothing showed slight alpha contamination until washed. Following the accident, exercise alerts were temporarily suspended and MDS B-47 wheels were checked for defects.
