2009-03704-F	Retallick, Michael	Elbit Systems of America	9/8/2009	9/9/2009	Inquiring on runway and taxiway incursion date for all AMC aircraft (Cargo, Transport, Tankers, C-5, C-17, KC-135, KC-10, C-21, C-130, etc) controlled by TACC. Specifically, by MDS, is there safety information on file describing numbers, time, event and location of any runway or taxiway incursions due specifically to weather (fog, snow, reduced visibility)? Also looking for Class A or B information associated with same aircraft platforms above for which weather was a factor (reduced visibility). For example, C-17 flight mishap history for FY02 indicates 2 Class A and 10 Class B mishaps. Was weather a factor in any of these incidents and if so, to what extent? Is there a dollar amount (\$) releasable? Reason for asking these questions is for a follow up from AMC Industry Days in Jun 2009. Elbit Systems of America is teaming with industry to enhance/improve autonomous aircraft landing systems.

2010-01392-F	Moscarelli, Anthony	Healthy Community Research of Suisun City	12/7/2009	1/5/2010	We are looking for the MIL-SPECS* and MIL-STD* for the 8 jet fuel pipeline that was put in about 1970 by the U. S. Army Corps of Engineers. That information will include coating types. A copy of the original procurement and installation requirements would have all this information plus the cathodic protection requirements and shut-off valve types. The cathodic protection requirements should include voltage, anodes type, and test point spans. If Travis AFB does not have this information, then a request by Travis AFB for this information to the U. S. Army Corps of Engineers (USACE) with the procurement number would help with this study. We are willing to pay the necessary costs as per Freedom of Information Act requires for the Base and the USACE. The widening of Highway 12 required the replacing of the 8 jet fuel pipeline on the Southern side of the Highway. Cal-Trans utilities maps drawn in 1993 show the abandoned 8 and 6 pipelines with the new located 8 pipeline that replaced the abandoned one. For the new 8 pipeline we would like the same requested MIL-SPECS* and MIL-STD* information.
