Im very interested in clarifying if Dr. Beardsley retired from Wright-Patt "prior to" moving in 1959 to the West Coast to do consulting work on an infrared project? Or, was he lost at sea June 7, 1960 while still a Wright-Patt civilian scientist? Also, what projects can you identify as those that he worked on or influenced during his over 14yrs of service at Wright-Patterson WADC and ATIC that began 1946 after his work on the Manhattan Project? I'm the project manager of a 50yr Commemoration of the event Dr. Beardsley was lost at sea with six others: see www.MARIEevent.com Much of my source comes from this recently de-classified doc: http://www.project-tnt.com/marie/documents/Dr_Niel_F_Beard_sley_in_memoriam.pdf

2010-03860-F	Mears, Dwight	US Military Academy at West Point	5/6/2010	5/14/2010	request for the policy workup and recommendation packet for the 2 OCT 1992 approval of POW Medals for USAAF aircrew held in Russia during WWII (see approval, attached). These actions went through OGC and the Secretary of the AF, so there should be a record of the review and recommendation in the archival holdings. Realize that the names will probably need to be redacted to conform to Privacy Act requirements, which is fine. Just interested in the policy explanations in the recommendation packets, since this is pertinent to a similar effort making through the Secretary of the USAF. Also working with the Armed Services Committee to amend the law behind this medal. This has current relevance to POW Medal award policy in Iraq/Afghanistan, and also pertains to effort to recognize approximately 200 AF veterans as POWs. The packet would have been processed between 1991-92 at HQ USAF. Would it be possible to search these archival holdings for the recommendation packet and policy determination? Sincerely, CPT (P) Mears

2010-04821-F	Stewart, Gregory	Orbiter LLC	5/25/2010	6/24/2010	Orbiter requests pricing informaton from a recent solicitation that was granted by Dunn, Francis E SrA USAF AETC 19 CONS/LGCA [Francis.Dunn@littlerock.af.mi I], solicitation number FA4460-10-T-0059 as follows: Item 0001 Mats with Antennas Quantity ____? Unit Price____? Amount____? Item 0002 AF Logo Yellow Champion Chip, Unit Price____? Amount____? Item 0003 Velcro bands Unit Price____? Amount____? Item 0004 Chip Scanner Unit Price____? Amount____? Item 0005 Nylon bags Unit Price____? Amount____? Item 0006 Training Unit Price ____? Total Gross Price of the Award ____? Providing the information on the pricing of the chip timing and lap counting product is proper. The legal justification is the Robinson-Patman Act (1936). Providing pricing information on government bids is allowed, and there is presedence such as fuel bids and many others which are disclosed. The rational is that a free flow of pricing information allows for greater market efficiency, optimum decision making and encourages competition which over time lowers prices.

I left my last duty station with just a telegram. I was sent over as part of an operation called "Limelighter." The Records Center has no records of me being their. My AF Form 7 has no entry of me being there also. My pay records was destroyed. My orginal primary duty station would have been Phan Ranh AB. According to the info I had then and my Limelighter number was either 158 or159. I travel from my duty Station Grand Forks AFB, North Dakota with no orders. All I had was orders to clear base and go home and wait for further instruction. I was station at DA Nang AB from January 10, 1966 to May14, 1966. My DD Form 214 and my AF Form 7 puts me in Vietnam on January 10, 1966. But from that date to May14, 1966 their is no info on my whereabouts. So for four months I was lost. Something has to show I was their. You just don't lose a person. There has to be something that will verfy I was their.

2010-05412-F	Jacobs, Edward	Self	8/3/2010	9/16/2010	From 1981 1986, was assigned to the Joint Defense Space Communications Station (Nurrungar) located at Woomera AFS, Australia. During that time was assigned duties in an area (technical building) that underwent a significant asbestos removal project, often resulting in monitored levels to high that we had to evacuate the work center and/or wear masks. My additional tasks often included technical building fire alarm response and search of the potential affected area (after hours), which often included the asbestos removal area (hence direct exposure in the cleanout worksite). Due to the high levels of asbestos fibers/dust often detected by monitors in our work center, was told by supervision/leadership that a memorandum would be made in record to indicate the routine exposure to high levels. However, many years later, a search of such a memorandum has net no such document in my records. As such, requesting all reasonable information in this regard to clearly document the Woomera AFS (Nurrungar) asbestos removal project (and exposure).

I would like to obtain: 1) Any report that was made regarding repairing the B-52Gs, or 2) Information about the B-52G's airframe and location of the cuts. 2010-05897-F	Parsch, Andreas	-	7/13/2010	8/3/2010	a summary of all aerospace vehicle MDS designations allocated since 1 August 2009. [NOTE: This request is identical to several earlier requests of the same kind, except for the later time frame of the requested MDS records.] 1. Why do I want the records? ===== ===== I would like to obtain said records for private, non-commercial research purposes. DOD's official public MDS listing (DOD 4120.15-L) has not been updated between October 1998 and the latest release in May 2004. During this time I maintained a web page, at URL http://www.designation-systems.net/usmilav/412015-L(addendum).html , with all new MDS designations assigned after October 1998. Because the next update of DOD 4120.15-L will probably again be several years in the future, I want to continue keeping my own listing up to date. Therefore the MDS allocation summary since 1 August 2009 is requested. 2. Location of the documents ===== The DOD release authority for all current MDS nomenclature records is AF/A8PE at HQ USAF, Pentagon. This request should therefore be handled by AF/A8PE. 3. Detailed requirements =====

If there is anything else you can send me besides the Commendation Medal and /or citation I would greatly appreciate it. I do have knowledge that he once saved his air craft when a piston went bad in flight. I am sure there is much more to my father than his death certificate and an accident report. I have contacted the hall of records which informed me that his records were lost in a fire in the late 1960's. Please let me know of my fathers military career as he was killed when I was just a year old. Thank you once again Bruce Tachibana, son.

2010-06891-F	Webster, Douglas	-	8/19/2010	8/30/2010	I was assigned to the 374th Tactical Airlift Wing, PACAF, from 1984 to 1987 at Clark Air Base, Philippines. That C-130 Wing operated a classified program which was known as "E-Flight." This was a small group of cleared crew members from the 21st Tactical Airlift Squadron that flew classified missions out of Clark Air Base, Philippines. The operation was overseen by 13th Air Force Headquarters at Clark. The C-130s were painted grey rather than camouflagage and flew without markings. The E-Flight mission apparently changed considerably over the years based on what is available online. It is said the organization supported operations in Tibet, Laos, and Cambodia at some point prior to my joining the organization in 1984. I would like to know what is publicly releasable regarding E-Flight operations in the period of 1984 to 1987 when I was a member. Thanks very much.

2010-07092-F	Corbin, Leroy	-	9/29/2010	-	I'm researching the crash of an Air Force B-29 that took place December 17, 1953, at Andersen AFB, Guam. Aircraft serial number was 44-87741. This was a non-combat accident where a number of civilian dependents were killed on the ground. Due to these civilian deaths, it's my understanding that the JAG was required to do a "collateral investigation", separate from the normal aircraft accident safety investigation, in anticipation of legal action against the Air Force. I would like to obtain a copy of the JAG's collateral accident report. I have a copy of the normal aircraft accident safety report. AFHRA does not have a copy of the collateral investigation report.

2010-07171-F	Webster, Douglas	-	8/30/2010	9/27/2010	I was assigned to the 374th Tactical Airlift Wing, PACAF, from 1984 to 1987 at Clark Air Base, Philippines. That C-130 Wing operated a classified program which was known as "E-Flight." This was a small group of cleared crew members from the 21st Tactical Airlift Squadron that flew classified missions out of Clark Air Base, Philippines. The operation was overseen by 13th Air Force Headquarters at Clark. The C-130s were painted grey rather than camouflage and flew without markings. The E-Flight mission apparently changed considerably over the years based on what is available online. It is said the organization supported operations in Tibet, Laos, and Cambodia at some point prior to my joining the organization in 1984. I would like to know what is publicly releasable regarding E-Flight operations in the period of 1984 to 1987 when I was a member. Thanks very much.

This Annex is/was an 83-foot long 24/7 closed quarters habitat with sleeping, living and recreational facilities for up to nine people. It is/was used to support, among other things, temporal-isolation living and testing spaces. My purpose in seeking this information is part of a non-commercial, personal research project into the Rail Garrison Program that terminated circa 1991. The program was a mobile ICBM basing concept planned around the deployment of dedicated "Rail Garrison" trains. One of the "Security Cars" -- either an engineering mock-up or actual prototype -- was moved to Brooks AFB. It supported to studies related to crew scheduling and other human engineering and deployment-matters involved in longer-term manned missions aboard a Rail Garrison train. I am particularly interested in any photographs of the outside of the Annex, especially those depicting the railroad car itself and any railcar-related markings. Any pictures of the interior of the Annex

Also, if this data exists prior to class 0001, I would also like to have access to it. If it is only in paper form, I am willing to pay for copies of these files. If there are electronic copies, that would be best. I am also seeking updated information on another Excel file that I had previously gotten from Vance AFB, titled (Class listing with attrites.xls) if needed I can provide the copy that I have for search purposes. The data I have covers FY00 to FY08 (FY08 is only partially covered). Again, if any of this data exists for fiscal years prior to FY00, that data would also be much appreciated.
