<u>2016-00025-F</u>	Bailey, Thomas	-	10/02/2015	11/20/2015	I request to see any document or electronic record indicating the rationale behind the recent change to the Standard of Proof in an Article 15. There is a paragraph within AFI 51-202 which specifies the Standard of Proof. On 31 Mar 15 AFI 51-202 was changed to indicate that Article 15s were not "advised" unless there was Proof Beyond a

					Reasonable Doubt. The prior version said "warranted" and had been used for over 35 years. Any change to an AFI will have some sort of rationale to support the change. This rationale may appear as a supporting document used in the staffing of the AFI, it may be in email text, or it may be in the comment section of the actual word document. This change was brought about as a result of a barrage of criticism I have launched against AFLOA and HAF/JA regarding decades of inappropriate legal advice. AFLOA and HAF/JA are on record as stating the Standard of Proof in Article 15 proceedings is a mere "Preponderance of the Evidence", the lowest possible Standard of Proof. However it is obvious that in reading the prior version of AFI 51-202, it was articulating a very high Standard of Proof. The ramifications of this inappropriate legal advice are enormous. I have filed an appeal with the AFBCMR asking for the verdict of every single case in history appearing an Article 15 be set aside and re-adjudicated based on this seriously flawed legal advice. 2016-00027-F	Perry, Craig	-	10/15/2015	02/11/2016	During the so-called Lackland sex scandal, the press reported as many as 31 Military Training Instructors (MTIs) were prosecuted for offenses up to and including rape and sexual assault. However, the official Air Force Sexual Assault Court-Martial Summaries, 2010 March 2015, includes only eight cases from this period. Furthermore, media reports are incomplete and often inaccurate in their depiction of these proceedings. Please provide a complete summary of all cases where the Air Force prosecuted current or former MTIs since June 2011. Include the name and rank of the defendant; the squadron to which the defendant was assigned at the time of the alleged incident(s); a synopsis of the case; the charges and specifications; the nature of the court-martial (general or special); the date of the Article 32 hearing, if applicable; the date(s) of the trial; the verdict on each count; and the adjudged sentence. <u>2016-00031-F</u>	Bailey, Thomas	-	10/05/2015	10/27/2015	I request to see any training materials used by The Judge Advocate General's School used to teach students about the Standard of Proof in an Article 15. Presumably there is training material in a basic course and likely training material in advanced courses. I have filed many complaints regarding AFLOA and AF/JA interpretation of AFI 51-202's definition of the Standard of Proof in UCMJ matters. For decades AFLOA has told Air Force appellate agencies that the Standard of Proof was "Preponderance of the Evidence", the lowest possible standard. Yet, if one reads the pre-31 Mar 15 version of AFI 51-202, it is clear that the Standard of Proof is actually a very high standard and describes a standard of "Beyond a Reasonable Doubt". As a result of my complaints, AF/JA changed the Standard of Proof to some slightly different verbiage on 31 Mar 15. I request any training material or instructor notes used to explain how lawyer students are instructed to interpret the pre-31 Mar 15 AFI 51-202 Standard of Proof and any new training material which might describe how the new version of AFI 51-202 should be interpreted. 					Strategic Air Command, after being trained to use the KW-26 cryptographic telecommunications machine, that he was sent to Vietnam on several occasions to install this equipment at various radio outposts in occupied territory. Strategic Air Command was not a special forces ground operations unit at that time, B. the KW-26 machine is over 6.5 feet tall and weighs several hundred pounds, making it highly improbable that (b)(6) team "hailed them up hills on dollies". For the sake of my family, I need to know whether or not he has been lying about his time in Vietnam, if he ever went to begin with. I do not have unit names. Though I'm not certain, I believe there were 7 persons on board and that the flight was from Bluie West 8 to Bluie West 1 (Greenland). I wish to obtain the flight plan and any releasable information pertaining to the identities of individuals on board (pilots, crew, and passengers), confirmation of departure and destination bases, and the purpose / mission of the flight. I'd also like to know the cause of the crash - newspaper accounts cite inclement weather, others cite engine problems. 2016-00129-F	Munno, Greg	TRAC Syracuse University	10/13/2015	11/03/2015	Dear FOIA Officer, Under the provisions of the Freedom of Information Act, we request a case-by-case listing of all FOIA requests received by the FOIA office from October 1, 2012 September 30, 2015, with the following data fields: (a) Assigned request tracking number (b) Office (where multiple components) (c) Date of request (d) Date request was received (e) Track assigned (f) Date closed (where closure has occurred at the time you process this request) Please note you will be regularly receiving requests for updated information on your FOIA workload. To the extent you have previously provided us complete information in the requested format on a particular closed case, it is not necessary to provide information on that case again. However, if you find it simpler to provide information on the status of every request received during this time period, this is certainly acceptable as well. This listing should be provided as a CSV or other equivalent machine-readable text format that retains the structure of the text in its original tabular form. [Equivalent formats, for example, include Excel, tab-delimited text, XML, fixed-column-width text. PDF files do not meet this requirement since the tabular structure of the text is stripped off from the original source when a PDF format is created.] We request that we be classified as a representative of the news media under the provisions of the Freedom of Information Act, and as representatives of an educational institution, whose purpose includes scholarly, scientific research. TRAC is a center jointly sponsored by the Newhouse School of Public Communications and the Whitman Management School at Syracuse University. TRACs faculty and staff carry out an active program of scholarly research, publication and distribution under the direction of its co- (b)(6) Our

					work focuses on the federal government and its day-to-day activities, including how federal agencies implement their obligations under the Freedom of Information Act. For more than two decades, we have gathered information of interest to the public, transformed this information utilizing our editorial and research expertise into various works -- including computerized knowledge bases and reports -- and actively distributed these works through a variety of channels, including through our two public websites: http://FOIAproject.org and http://trac.syr.edu. Our publications are widely used by other researchers, the news media, government, and the public. For a sample of recent citations to our research and reports, see: http://trac.syr.edu/tracatwork/. We also request a full waiver of fees. As you are aware, FOIA sets strict time limits for responding to requests because timely receipt of the information that must be made public is a cornerstone of having an informed citizenry. Thus, there is substantial public interest in monitoring the success of an agency in meeting these timeliness goals. Indeed, because of their public importance, Congress requires each federal agency to compile and publish statistics on FOIA response times and pending caseloads each year. However, by the time these FOIA reports are available to the public, they are no longer timely. It is the purpose of this request to gather and analyze the requisite data to provide regularly updated FOIA monitoring reports on your agency. We look forward to receiving this information. Should you have any questions, or if we can be of any assistance, please feel free to contact us. Thank you very much. Susan B. Long an

I am looking to obtain a copy of any regular briefing materials generated by an entity known as "Task Force 48-4" or "TF 84-4," which may be a part of US Air Forces in Europe. Materials published by The Intercept (https://theintercept.com/dron e-

					papers) on 15 October 2015 refer to a unit described as such operating from a variety of locations in the Middle East and Africa. USAFE's 48th Fighter Wing makes regular deployments to the region and it is possible they are related. If an exemption applies, however, please consider exercising the agency's discretionary release powers to disclose the records. Additionally, please release all reasonably segregable portions of the records that do not meet an exemption. I am also willing and would prefer to receive any release in an electronic format. Thanks, Joseph Trevithick

Protection for the decision making process is appropriate only for the period while decisions are being made. Filius is not requesting any information that would be exempt under FOIA's Exemption 4. - Confidential Business Information. We are not seeking any trade secrets that would cause substantial harm to the competitive position of the incumbent(s) or impair the government's ability to obtain necessary information in the future. In order to help to determine my status to assess fees, you should know that I am affiliated with a private corporation and am seeking information for use in the company's business. I am making this request as a "media" requester. I am looking to obtain any audio logs between any and all pilots and crew from the New Jersey Air National Guard, each other and/or personnel on the ground during

					the mission to monitor a Joint Land Attack Cruise Missile Defense Elevated Netted Sensor System (JLENS) aerostat that broke free of its mooring at Aberdeen Proving Ground, Maryland and drifted into Pennsylvania on 28 October 2015. According to the North American Aerospace Defense Command, "Two F-16 Fighter jets from Atlantic City Air National Guard Base monitored the JLENS Surveillance System aerostat as it drifted northward over Pennsylvania." (See: http://www.norad.mil/Newsroom/PressReleases/tabid/3993/Article/626350/update-3-detached-military-aerostat-lands.aspx) If an exemption applies, however, I ask that the New Jersey Air National Guard and 177th Fighter Wing please consider exercising their respective discretionary release powers to disclose the records. Additionally, please release all reasonably segregable portions of the records that do not meet an exemption. I am also willing and would prefer to receive any release in an electronic format. Thanks, Joseph Trevithick

<u>2016-00894-F</u>	Newman, Craig	-	12/11/2015	01/07/2016	I am attempting to obtain information in regards to a B 52F-7-BW Stratofortress with tail #57-0173 that crashed during a training flight on Feb. 29, 1968. The B 52 was part of the 7th Bomb Wing located at Carswell AFB. The plane took off from Carswell AFB on a training mission and crashed off Matagorda Island, Texas. Their were a total of 8 crew members on board and none of the crew survived the crash. I would like to obtain all records available regarding this plane crash, ie: crash investigation and any other records. I would like to obtain the area searched after the crash and what was recovered from the crash site. The information may be located at Dyess AFB due to the fact that the 7th Bomb Wing was moved from Carswell AFB when it closed in 1990. The research also shows that; Air Force mishap records related to Aviation, Missiles, Weapons, Space, and Ground accidents must be requested through HQ AFSEC, Kirtland AFB, NM. More specifically, HQ AFSEC maintains all Safety Investigation Board (SIB) Reports for Air Force mishaps from 1956 to present. (Date Range for Record Search: From 02/28/1968 To 02/28/1969)

A copy of the Solicitation from fbo.gov is attached for your reference. Specifically, Chromalloy requests the following documents: All Market Research and related analysis conducted in support of the Solicitation. The Justification and Approval ("J&A") authorizing a sole source award for the engineering expertise and logistical support services supporting the repatriation of repair work for F108 core engine modules. o According to the Air Force Office of Legislative Liaison, the J&A concludes that a sole source contract is necessary because the original equipment manufacturer ("OEM") is the proprietary owner of the CFM- 56 engineering design and solely possess the capability to modernize and improve the performance of the military engine platform. All business case analyses regarding the decision to repatriate the F108 workload to an organic capability at Tinker AFB, including any business case analyses of the organic transition. The Depot Source of Repair ("DSOR") decision designating F108 module/component repair work as a core logistics capability. A copy of the Air Force's original license for the use of the OME's (CFMI) technical data for the original F108 Re Engine Contract (original award approximately 1980) and

					any subsequent options or contract awards for the duration of modification. o All documents related to the Air Force's negotiation of the license(s) above. A copy of any license for Air Force use of F108 technical data that was changed or issued after the award of the F108 Re-Engine Contract. o All documents related to the Air Force's negotiation of the license(s) above.
